"Your Hardware Merchants"

W. I. Monthly Meeting

The regular monthly meeting of the Champion Women's Institute was held on Tuesday afternoon, June 8th, at the home of Mrs. J. L. Price, with the President in the chair. Thirteen members and three visitors were present. The roll call was answered by "Current Events."

The President explained that the committee appointed to arrange the tea and bake sale for May 22nd had felt that the time between the last meeting and that date was not sufficient to give them the opportunity of making such an undertaking a success, and so the matter had been dropped. The members, calling to mind the dust storm of that particular Saturday, were rather inclined to regard the postponement as providential.

Correspondence included a letter from S. H. Grandier, Deputy Minister of Agriculture, stating that it would be impossible to place Champion on the schedule for short courses in June, but that there was a possibility of a further schedule of Bureau meetings during the month of August when the Institute might be included. An outline of the courses offered by the Alberta School of Community Life to be held at Olds, June 24th to July 10th, had also been received.

Mrs. R. I. Baker, as Chairman of the Standing Committee on Child Welfare and Public Health, explained that Dr. Freeze was holding the annual school clinic on Tuesday and Wednesday, the 8th and 9th, and had asked for the assistance of ladies from the Institute. The clinic had proceeded quite successfully Tuesday morning, but one additional assistant was needed for Wednesday. Mrs. Jopling kindly consented to aid in this way.

A critical analysis of government taxation systems might lead one to the conclusion that certain classes of citizens and industries should be treated as economic offenders. Take, for example, the automobile owner and the oil industry. They are to some extent in the same class as a visiting artist who takes money out of the country for some intangible benefit. For this reason, and because yesterday the automobile was a luxury, its owner is treated like a star cur.

That a large fraction of government costs should be imposed through stiff license fees and high gasoline taxes, on this one means of getting about, is a striking example of the irrationality of our tax system. For the dollar the motorists pay in the western provinces, the governments are spending only a little more than cents on the dollar. Through the two forms of levy mentioned, motorists have paid twice for every foot of road that has been built in Canada. And as if this were not enough, they are still being pillaged simply because they are easy prey for the tax gatherer. Art. 22

When the subject of finances was again brought to the fore it was moved by Mrs. Alexander, seconded by Mrs. Earles that the Institute start a series of "diminishing teas", the first hostess to begin with five guests, each of whom will agree to hold a tea with four guests and so on. Carried. Mrs. Alexander kindly offered to have the first tea in the very near future. It was agreed that the charge for these teas be placed at 15 cents. It was understood that the teas should take place in as quick succession as was considered feasible, the majority to be over possibly within a period of six weeks.

This concluded the business meeting, and Mrs. E. I. Baker then presented her report of the Twentieth Provincial Convention of the Alberta Women's Institutes, recently held in Calgary. A vote of thanks was tendered for her work in this connection. Mrs. Hamilton made further comments on the convention, told of her pleasure in meeting old friends, and promised some day to give the members more recollections of her long term of service with the Alberta Women's Institutes.

Misses June Ashmore and Caroline Baker entertained the members and guests with the elocution selections which won them honors at the Musical Festival in Calgary. It was announced that the July meeting, as usual, would be held at the home of Mrs. M. G. Clever, and that the speaker would be Mrs. A. A. McQuarrie of Barons, the new District Director for District No. 4. The ladies of the Institute always look forward to these annual summer meetings at Mrs. Clever's home.

After the conclusion of the meeting and the singing of the National Anthem a delightful tea was served by Mrs. Latiff and Mrs. Price.

CARMANGAY IN THE LIMELIGHT

Do we as Claresholm people lack the progressive spirit? Let's just take a moment to analyze the situation. Let's compare ourselves with the people of Carmangay. As a matter of common record we have a far better productive area than Carmangay. Yet they say the need for hospitals, and good times or bad, proceed to organize and provide one. In Claresholm we've got to wait and see whether it's going to be a good year—forgetful of the fact that hospitalization is a thing required good years and bad—and that a project of this sort must of necessity be viewed from a long range perspective. Just think this over.—Claresholm Local Press.

LOCALS

M. F. Hamilton was a visitor in Calgary over the week end.

Mrs. E. Freeze was a tea hostess on Saturday.

Bob Maxwell is renovating the interior of his shop this week.

Miss Annie Grocock, patient in the local hospital, is making fair progress.

Mrs. C. Parcell was a tonil patient in the local hospital on Saturday.

Mr. and Mrs. W. R. McEneaney were Calgary visitors on Tuesday of this week.

Mr. and Mrs. Wayne Anderson and family were Lethbridge visitors over the week end.

With S. Milfin in charge repairs have been underway at the Town office.

Mrs. J. Muir was a dinner hostess on Sunday when she entertained in honor of Rheta's sixth birthday.

Mr. and Mrs. L. Price left Friday for Calgary and Banff, where they will spend a short holiday.

Miss Ada Williamson will leave in September to take up training in the Vancouver General hospital.

Miss Jennie Urstein of Calgary was a recent visitor at the home of Mr. and Mrs. W. F. Bozarth.

Norman Carlson underwent a minor operation at the Vulcan hospital last week when he had a toe amputated. He is able to be around on crutches.

Mr. Milfin has taken up residence in the house owned by Mrs. B. Anderson and recently vacated by Mrs. A. Diemer and Miss E. Diemer.

Rev. P. Dawson, M. L. A. was a week end visitor in town from Edmonton, handling the Sunday service at his church here.

Church of England services for the Champion-Carmangay congregations will be held in Champion Community hall Sunday afternoon at 3 p. m.

Mrs. J. Castor left Friday for Vancouver where she will spend an extended period visiting with her daughter, Mrs. W. Goreche.

During the recent school clinic in Champion, 141 students were examined. Examinations were also conducted in all rural schools adjacent to Champion.

W. A. Volsey of Vancouver is at present a guest at the home of his brother, Guy Volsey. Mr. Volsey is connected with an Advertising Agency and in this capacity is combining business with pleasure while visiting in Alberta.

Miss Elsie McLean expects to leave early in July for Smooth Rock, Ontario, where she will join her mother who was called east due to the illness of her father. Miss McLean will extend her holidays to New York.

Edwin Lundberg met with a painful accident while performing his duties in one of the local coal mines; his right hand was caught in the gears of the machine and crushed which necessitated the amputation of two of his fingers. His progress in the local hospital is good.

All high school students are busy this week preparing for examinations which commenced Wednesday. Examinations in the public school will commence June 30th.

Miss Buddy James of the local telephone staff left Monday evening for Vancouver, where she will spend two weeks. Miss Ada Williamson will fill the vacancy on the staff left by her absence.

Among Lethbridge visitors on Saturday were Mrs. J. S. Collins, Miss Helen Collins, Mrs. C. Williamson, Miss Ada Williamson, Miss M. McCullough, Miss A. McCullough, Miss Ruth Anderson, Miss Dorothy Ditto, Miss Leah Miller, A. Verduyn, R. Robinson, S. Lindstedt, and others.

The district received a soaking rain on Thursday and Friday, 1.10 being registered in town. Rain commenced falling early Thursday and continued all night. The sky was overcast Friday morning with the odd shower falling. There is scant moisture here and growth should be good.

Of interest to Champion and district is the announcement of the engagement of Alice Isabel Dalgleish daughter of Rev. and Mrs. R. W. Dalgleish of Claresholm, to Carl B. Johnson, B. Sc., son of Mr. and Mrs. C. H. Johnson of Champion. The marriage will take place in July. Mr. Johnson is well known in this district having lived here for many years. He attended High School in Champion. He has been principal in the Claresholm High School for the past two years.

Following the rains over the week end when precipitation totalling 1.08 in town and 2.25 west of town was registered, crops are making good headway. The growth as a whole is somewhat backward as warm weather has not been experienced to any extent but where moisture was present at time of seeding stands are several inches in height and very healthy in appearance. Grain seeded on stubble is showing better growth in many instances than summer fallow due undoubtedly to the fact that the former held snow. The grasshoppers are appearing in alarming numbers with the warm weather of the past three days and grasshopper bait is much in demand. Over 150 tons have been distributed up to date and the amount mixed daily is increasing. Windblown patches are coming back. The country presents a very beautiful appearance with the increased growth in grass, flowers, and shrubbery.

Mrs. C. Williamson entertained at dinner on Tuesday evening, June 15th, in honor of Mr. and Mrs. J. C. Anderson, who were celebrating their fifteenth anniversary. The guests of honor were the recipient of a lovely gift.

Right now, dandy cabbage plants, 25 for 25c, at Campbell's.

Mr. & Mrs. E. Williamson Honored At Party

Mr. and Mrs. E. Williamson were honored the other evening when about sixty-five of their friends dropped in to say "au revoir," on learning of their departure from the district. During the evening a presentation was made on behalf of those present, and Mr. and Mrs. Williamson were the recipients of a lovely gift, together with sincere wishes for their future happiness.

Those who have been greatly missed by their many friends throughout the district, and the well wishes of all goes with them in their new home in east Calgary.

Those who signed the register were: George Rhodes and family; Grandpa Rhodes, Mrs. Sander-son, Jack and Mavis; Mr. and Mrs. Archie Ruggles; Mr. and Mrs. Ross Ruggles and son; Mr. and Mrs. Royal Ruggles; Mr. and Mrs. Marshall; Mr. and

Mrs. Roy Taylor; Mrs. Vange and family; Mr. and Mrs. E. Munton and family; Mr. and Mrs. Lesly Marshall; Mr. and Mrs. Bert Ruggles; Mr. and Mrs. Wayne Ruggles; Mr. and Mrs. Schuurman and family; Mr. and Mrs. Tom San derson and family; Roy Woodworth and Hans Ant-nager.

The following is the average rainfall as given by the—

CIGARETTE PAPERS

Science And World Peace

In the past few years, and even in the past few months, science has made remarkable contributions in the direction of prolongation of human life in the fields of both surgery and medicine.

In support of the foregoing statement reference only is necessary to the daily newspapers, for very few days pass without the announcement of some new medical discovery of importance to the human race or of some new excursion into the realm of surgical science, in some part of the globe. Diseases to which human flesh is prone are being conquered one by one and the severity of other diseases which have not yet entirely succumbed to laboratory or other experimental treatment is being mitigated, either in the field of preventive medicine or by new forms of treatment.

As a result of this wide spread experimentation and treatment the span of human life is being gradually but surely lengthened with prospects of further increases in life expectancy as discoveries progress on geometric scale.

In Washington recently Dr. Parran, surgeon-general of the United States announced that in the last 80 years the average length of life of men has increased from 28 to 67 years, and that of women from 40 to 64 years.

He predicted that in the next few years the incidence of heart disease, a greater killer than cancer, will be materially reduced as a result of the present drive to control and eradicate syphilis, a contributing cause of heart failure, and said that considerable progress in lengthening the lives cancer sufferers may be expected in the next few years as a result of campaigns to educate the public to the fact that the disease is curable in its early stages. There are prospects that even the common cold will be banished in the near future.

All this is so much to the good, and in this field science is conferring great benefits upon humanity, but, on the other hand, science is also being utilized as a handmaiden to the god, Mars, for the destruction of the human race on a wholesale scale.

As an agent of destruction human life science is being harnessed and requisitioned at a tremendous rate. Since the Great War U.S. new engines of warfare have been developed capable of carnage which will make the slaughter in the former war look puny by comparison. New gases have been evolved capable of creating tremendous havoc among civilian populations as well as fighting forces, and the range and range of instruments of destruction have been increased enormously, so much so, that it is sometimes asserted, with possibly a degree of truth, that another major war has been averted to date, only because of the fear of the consequences.

While it is impossible to make a comparison on a mathematical basis of the life-saving and life-destroying possibilities of scientific achievement, it is probably not a far-fetched guess that greater strides have been made in the destructive field in the past decade than in the beneficial one.

One is sometimes tempted to ask: "What is the use of expending money and brains in bending science to the service of mankind to save and prolong life and to promote health and happiness, if the same agency is to be utilized to destroy humanity on a grand scale?"

Nevertheless, the energy and treasure spent on research and experimentation in the medical area is worth while for the benefits they confer on suffering humanity in better health and life extension; in the hope that governments which are flitting with wholesale murder and rapine will come to their senses, or that the rank and file of their subjects will bring such pressure to bear upon them that they will dare not push them over the brink of the precipice which appears to gape for them.

With this frightfulness in prospect for the next great international conflagration and with the usefulness of the League of Nations as a practical preventive of war in the discard, at any rate for the time being, people of the world, and more particularly those of the democratic countries, are looking around for some agency or some measures that will ensure peace and prevent a slaughter that might well be the worst of the four.

Various suggestions have been made, not the least interesting of which is a proposal for some sort of pact or understanding among the democratic nations as an insurance policy of self-preservation and this may be the practical solution of the problem at hand.

An alliance of the chief Anglo-Saxon democracies—the British Empire and the United States—together with the northern European democracies in the interests of the world peace could not at all be a disadvantageous powerful curb on those countries which might desire to precipitate conflict or even the most powerful coalition of war-mind nations, if such an alliance can be brought about.

Systematic Giving

Pittman Islanders Make Sure Tenth of Income Goes To Church

Every Pittman Islander (of a "tenth on the income") fame) gives a tithe to the Bounty to the Seventh Day Adventist Church. Every tenth orange tree, bread fruit tree, coconut tree is branded with the sign L X—the Lord's tenth. Every tenth row of ground is marked with the sign L X—the Lord's tenth. Every watermelon has the sign scratched upon its skin. No intoxicating liquor of any kind is used on the island nor does anyone ever smoke tobacco.

GIN PILLS FOR THE KIDNEYS

Penalty Was Light

London Magistrate Gave Reckless Driver Most Inadequate Sentence

A man of 29 years was in court at London, Ont., and the charge was reckless driving. The magistrate said he had no doubt to make to crash into the rear of another machine on the highway. Though the two-lane bridge, plunge over an embankment and land on top of a tree.

Court decided he should pay \$25 and costs or go to jail for three months. Likewise it was considered advisable that his permit to drive a car should be suspended for three months.

It may be that by the end of three months the young man will have reformed; or again he may have committed a new set of tricks which he can try upon the streets driving again.

—Peterborough Examiner.

A travelling man who had been obliged three times to take an upper berth in the sleeping car "Alaska" has requested the Pullman company to please name the next one "Annapolis."

Most recipes for any type of food or dish call for a pinch of salt. When baking a cake, whether the recipe calls for it or not, a pinch of salt adds flavor that you cannot get in any other way.

Opinion Is Wrong

Danish Bacon Is Not Superior To Canadian Product

The erroneous opinion is entertained in some quarters that Danish bacon sells at a higher figure than Canadian bacon on the British market, largely because the Land of the Danes from which Danish bacon is made, is superior to our native bacon. The real situation at this time is that the Danes are allowed to ship only so much bacon to the British market as they are on a quota basis. Naturally they cut their product very closely, sending only the best. Moreover, it sometimes happens that there is not enough Danish bacon to fill the British market to supply the demand, and the price is consequently enhanced. The Danes could take out good strains of Yorkshire and maintain the same relative position in the British trade.

In Canada the Landswine under test at Ottawa have not proved to be highly superior to our own best bacon strains. Certainly they are of good breed and baste, but it is doubtful whether they would prove to be enough better than the Yorkshire breed to warrant their introduction and distribution in this Dominion. That would mean the establishment of a new breed and another source of production from countries where foot and mouth disease is always present. Our import regulations would have to be drastically revised, and that in turn would bring us into conflict with health regulations governing our export of live stock to United States.

No, the adoption of the Danish breed is not the solution of our problem. It would only create new ones for us to face.

Expert Was Well Paid

New York Locksmith Opened Jewel Chests For Spanish Royalty

Charles A. Courtney, New York locksmith, returned from Spain after spending four weeks as a royal-hired "Jimmy Valentine" picking the locks of six jewel chests owned by the Spanish Bourbon family. The chests, removed from Madrid when King Alfonso XII fled Spain in 1871, had defied the attempts of Europe's leading locksmiths to open them.

Courtney said he was unable to estimate the value of the jewels he saw.

"I don't know what they were worth," he said. "The king paid me on the trip to buy up a \$50,000 collection of rare locks and keys from the Rothschild family, Count Dillinger of Vienna and the heirs of the Emperor Franz Joseph of Austria," he said.

While in London, Courtney attended a meeting of "mitten treasure" hunters interested in salvaging valuables about the ill-fated S.S. Lusitania, which was sunk by a German U-boat on May 7, 1915, off the southeast tip of Ireland, and sank with the loss of 1,288 lives. He said the group decided to abandon the enterprise because there was no gold on the ship.

The Press Keeps Pace

Publications In Canada Have Long Record Of Adverse Criticism

In a country as young as Canada, one does not expect to find many individual publications extending their history going back as far as 1850. Yet the Canadian publication industry can boast of 10 daily newspapers, 17 weekly newspapers, three religious periodicals and one magazine, all in active operation, that had their beginnings earlier than the middle of last century. That makes 31 publications, each of which is 87 years old or older. And if the honor roll were to begin at 60, there would be 204 publications that would qualify, 199 of them being in Eastern Canada, the part settled first. To-day there are many papers available to advertisers, but none with the long and distinguished record of useful service, both to advertisers and the public, that is the boast of the press of Canada.

—Saskatoon Canadian Observer.

Letter Was Delayed

A post-card that has had 20½ years of unknown history, arrived at the Edmonton Chamber of Commerce recently. It was postmarked December 5, 1911, from A. D. Cartwright, at that time secretary of the Board of Railway Commissioners of Ottawa, and addressed to F. T. Fisher, then secretary of the Chamber.

In 1931 Great Britain imported 16,495 cwt. of Canadian bacon and in 1930 this increased to 1,092,000 cwt. This is entirely due to the Empire trade agreements.

The habit can change its color to match its surroundings.

The man who has to struggle for a living acquires a superior education.

Great Believer In Canada

Experimental Station Officially Thinks It Best Place To Live

Frank Reek offers more to the individual than any other nation in the world, Superintendent W. R. Reek of the Western Ontario Experimental Station told members of the Men's Association of the Erie street United Church in Ridgeway, Ontario, at a luncheon. The real situation at this time is that the Danes are allowed to ship only so much bacon to the British market as they are on a quota basis.

"Then let us stay here and be loyal to our country, our Empire and our King."

Interesting facts about Canada mentioned by Mr. Reek included information concerning its rivers, the Mackenzie, including the Peace, 2,925 miles in length, the St. Lawrence with the lakes 1,900 miles, including the south branch, 1,400 miles and the Churchill 1,000 miles long. Canada's fisheries produce 500 species of fish and export to various parts of the world annually to 100 different countries; in forest wealth, Canada is third to no new breed and another source of production of paper, the government controlling nine-tenths of the forest; out of Canada's two and a quarter million acres of land only 1,000,000 acres are cultivated.

An interesting fact concerning the canal at Sault Ste. Marie was told by Mr. Reek: "In 1929 the canal at Sault Ste. Marie had three times the tonnage of the Panama Canal, and the Panama Canal and the Suez put together."

Rare Currency Destroyed

Duplicate U.S. Notes Were Property Of Late Betty Green

A suitcase full of rare currency was stolen from a home and burned at the U.S. Treasury. Authorities said it would have been worth \$1,600,000.

"The collector's market," they disclosed the currency was from a collection started by the late Betty Green, a noted collector of the world's wealthiest woman.

It was turned over to the Treasury for its face value of \$188,170. The collection is one of the most valuable in the world, officials said, containing two sets of all notes ever issued by the Federal Government.

Explaining why the Green estate handed over currency worth \$1,600,000 for less than a fifth of that figure, officials said James W. Wade, of the Chase National Bank, at New York, had advised this to be done. They said that the collection, which the collection contained more than two of any type of note, the extras should be redeemed.

Wade said the usual Treasury policy is to destroy redeemed currency when it is of a kind no longer being issued. This is the effect of one of the remaining Green collection more than two of any type of note, the extras should be redeemed.

SELECTED RECIPES

CARAMEL DELIGHT

1 cup brown sugar
1 cup Crown Brand Corn Syrup
1/2 cup boiling water
4 1/2 tablespoons Benson's Corn Syrup
1 teaspoon salt
1/2 cup cold milk
2 cups scalded milk
1 egg
1 teaspoon vanilla
Caramelize the sugar and Crown Brand Corn Syrup; add boiling water and cook until quite thick. Mix Benson's Corn Syrup, salt and cold milk to a paste; add scalded milk in top of double boiler, stirring until thick. Add caramel mixture. Cook 20 minutes, stirring occasionally. Add vanilla and the yolk of an egg, cooking 3 minutes; add vanilla. Chill and serve with Crown Brand Corn Syrup, topping with walnuts.

The Punishment

An old Scots woman was wandering round the local museum with her grandson. When they came to the usual statue of Venus de Milo, with half an arm missing on one side and the whole arm cut away on the other. "There ye are, my lad," said the old grandmother, wagging her finger to the youngster. "That's what comes o' letting yer finger-nails."

The greatest of all developments in artificial illumination occurred when Thomas Edison perfected the incandescent electric lamp at Menlo Park, N. J., in 1879.

A man isn't really old until he begins saying he feels younger than he did ten years ago.

There are 6,000 sizes and shapes of tin cans in use in the world.

Noted Inventor Died Poor

Received Very Little For Perfecting Process For Engraving

Frederick Eugene Ives, who did more to develop modern newspaper and magazine illustration than any other man, died in Philadelphia at the age of 81 after a long illness.

It was Ives who invented the halftone process of photoengraving which permitted reproduction of photographs and even paintings with great fidelity and artistry.

Before the perfection of the halftone and instead of screen of almost invisible dots is used in reproducing pictures to bring out the gradations of tone, most newspaper illustrations were made from wood cuts and the effect often was crude. Ives also devised the intaglio plates which preceded the rotogravure supplements. He was a pioneer in color photography and introduced the modern form of the binocular microscope.

Ives obtained more than 70 patents on his inventions. But he failed to patent his halftone process, which he kept the first firm that employed it hoped to keep the system a secret and instead of becoming a millionaire, the inventor, in his later years, had barely enough to keep to live. Although he became partly blind in his old age, Ives continued his research, especially in the field of color photography, with his usual enthusiasm.

17,673,000 Miles Of Flies

How Long Would It Take To Kill Each One?

From May 1st to September 30th, it is estimated that a female housefly has laid approximately 2,000, 720,000,000 descendants! Supposing a fly is a fifth of an inch long and all these flies were laid end to end, there would be more than 17,673,000 miles of flies.

This sounds like a serious problem but, fortunately, they don't all live and people instead of bothering about putting them end to end, put them to an end once and for all.

And the best time to do the killing is when the flies first appear. Each fly killed then eliminates the danger of millions later.

Flies are a menace to health, they carry germs and summer diarrhoea, typhoid and other dangerous diseases. The word of good can be said in their favour.

There's only one way to keep down the insects. Breeding places such as uncovered garbage, rot, manure, and other matter must be eliminated. Screens on doors and windows and insecticides, and drink should be used. But, best of all, if flies do enter the house, use Benson's Fly Paste placed around the house. If used regularly according to directions they will kill all of the flies in short order.

Included In Treaty

A very old and exceptionally large tortoise once lived on the island of Alderney, one of the Channel Islands, a national possession, and in 1880, when the French ceded the island to England, the tortoise was specifically mentioned in the treaty.

The Bank of England has a \$200,000 kitchen which can serve lunches at the rate of 2,000 a day. It is said to be the largest and most costly kitchen in London.

Middlesex is the most heavily populated county in England.

Some people wait until they are requested to do things, and are others wait until they are requested not to.

Sensitive Instrument

New Earphone Recording Instrument in Use At Ottawa

The Royal Society of Canada was told of a new earphone recording instrument as sensitive it picks up vibrations of traffic several miles away.

Ernest A. Hodgson, seismologist at the Dominion Observatory in Ottawa, told the physical sciences section of the society the observatory has acquired one of the instruments of which there are not more than a dozen in the world. It is called the Bernier instrument and makes a record of vertical tremors only, that is those shocks which start deep in the earth and travel upwards.

The recording is photographic. Vibrations of the instrument cause a beam of light to move down along a piece of photographic paper fastened to a revolving drum. In the Bernier machine there are two recording components, one for quakes of short duration and the other for those that last a long time.

One of the difficulties associated with other types of seismographs was that when the recording unit was opened the machine had to be stopped. The result was that a quake occurred during the operation, the record was lost and the operators left it alone as far as possible.

With the Bernier instrument, it will be possible for the seismologist to remove the record of a brief quake—they are usually more or less local—while the long-time record continues uninterrupted.

Dr. Hodgson said the machine cannot be operated at full sensitivity in Ottawa because it picks up tremors from the city itself and from tremors made by heavy trucks, passing trains or blasting.

It has been adjusted to work without such a hair trigger, but it is still sensitive enough to pick up a quake that might be felt anywhere in Canada or the United States.

An Aid To Research

A brief history in the Baltimore Sun records the life of a man who became a national possession, and in 1880, when the French ceded the island to England, the tortoise was specifically mentioned in the treaty.

The Bank of England has a \$200,000 kitchen which can serve lunches at the rate of 2,000 a day. It is said to be the largest and most costly kitchen in London.

The Direct Road To Better Business

In what they called the good old days the buying public used to buy more on a hit-and-miss idea, if the merchant didn't have a certain article, he put in what he had and you had to like it. Today it is a different proposition; a high per cent of the buying public buy from advertisements, and they demand certain kinds of merchandise, they are not taking the "just as good," their mind, and their purse are both made up to reach just so far. The merchant that advertises his wares, will stand a much better chance of doing a greater volume of business, than the one who waits for the customer to accidentally run across the article that they have been wanting.

The invitation to come to your store and select the family needs as advertised, really has a dual purpose, it gives the public the opportunity of finding out who has certain goods, and what they are going to cost them before any attempt has been made to buy.

The catalogue houses get many thousands of dollars annually from every district in the country, why, because the catalogue is placed in their home, with the price on every article. The public know what each individual article is going to cost them, and without argument they select their goods, and away goes a few dollars more of our district money. You, Mr. District merchant can use the same method, at a much smaller cost through your local paper.

Carmangay News

The Community Concert and dance held in the Community hall, June 4th, in aid of the hospital, was a decided success.

A fine spirit of neighborliness prevailed, which made the evening's entertainment most enjoyable. The programme was splendid throughout; and those who took part, and made possible the entertainment are to be commended. The community singing was under the direction of Const. J. Ridley of Barons.

Mrs. Vilas Toesky, on behalf of the Hospital Board thanked everyone who assisted in any way towards the evening's entertainment.

Fraser's orchestra supplied the music for the dance that followed the concert. The sum of \$108 was realized on the dance and concert.

The following is a list of entertainers:

Top dance—Edith and Peggy Grant.

Solo—Mrs. Roberts.

Russian dance—Lois Egger.

Viola—G. L. Robertson.

Alleg. Blue Gown—Ruth Irwin.

Top dance—Vera and Marjorie Cook.

Anchored—Const. J. Ridley and Nancy Parker.

Elouation—Wilma Ohler.

Chinese dance—Lois Hubka.

Dutch dance—Eva Fraser.

Concertina—Wm. Honeyman.

Comic dance—Beverly Roberts and Betty Doran.

Smiling Through—Beverly Roberts.

A concrete sidewalk is to be laid round the hospital, rocks for the foundation work have already been hauled up.

Mrs. Francis and Eddie left last week where the former will join her husband in Red Deer. J. Fraser moved the furniture.

Carmangay won the ball game Sunday against a team from west of Barons, the score was 7 to 5.

The community mourns the death of a beloved citizen, Mrs. William Cook, who passed away at the local hospital Sunday last. Deceased was in the hospital for over a week and it was thought that her condition was very favorable. She leaves to mourn her loss, her husband, William Cook; four daughters, Viola, Dorothy, Vera, Marjorie and one son Harold. The family have resided here for the last ten years, having come from Lethbridge. The funeral was held Wednesday last in Lethbridge.

Among those taking advantage of the excursion to Lethbridge last Saturday were Misses Molly and Joan Bastin.

AN IMPROPER METHOD (The Hanna Herald)

Blanket debt legislation is ill-advised, unfair and harmful. Alberta people need expect no permanent advantage from such laws. On the contrary they will do irreparable harm.

Most people are honest. The great majority of debtors want to pay. Alberta people are not chiselers and defaulters that they now appear to be before the eyes of Canada and of the world.

There are a considerable number of Alberta farmers, however, who simply cannot meet their mortgage obligations. Bad crops and low prices over half a dozen years have robbed them of their earning power. These people must have special consideration.

The way Manitoba and Saskatchewan tackled the problem of farm mortgage indebtedness was reasonable and sensible. First they got the interest rate cut to six per cent, which is where it should be. Then they arranged with the lending institutions for adjustments in instalments where arrears of interest had accumulated. This eased the debtor's name from the role of those in arrears and gave him a fresh start and a new encouragement.

In Saskatchewan alone fifteen million dollars were written off mortgage indebtedness through commonsense co-operation, and a comparative amount was relieved from debtors' backs in Manitoba.

In Alberta today no debtor knows for sure whether he has been relieved of a cent of accumulated indebtedness. Blanket debt legislation has been a curse rather than a blessing.

A man who can't pay should pay. A man who can't pay should be aided. Blanket debt legislation does not work that way. A plan of compromise and adjustment does work that way.

1c-A-MILE EXCURSION Calgary - Vancouver \$14.85 RETURN From Calgary 8:35 a.m. July 2. Return from Vancouver 8:15 p.m. July 3. Agents: A. E. R. A. Apply Your Local C. P. Agent.

Alberta is not completely done and out—ask for all time. This province can and will come back. The time will come when our farmers will again require credit. That is something our people should never forget.

So let us handle the present problem of debts in a reasonable, sensible and decent manner. Let us follow sound British tradition and example. Let us forget this South America idea of default and blanket debt legislation. Such a move is a step in progressive human degeneration.

Last Sunday a record crowd witnessed a ball game between the Harmony Blue Birds and Sunny Glen. The Blue Birds were victorious by a score of 28 to 6. 1 Siler made two home runs, one with the bases full. Outstanding players were I. Siler, M. Patterson and A. Patterson; the latter having 17 strike outs. Batteries for Harmony were: Patterson and Tindal.

The Harmony boys team were not so fortunate, the game which was very even, and looked like a win for Harmony was lost by three errors, and what appeared to be a bad decision on third base. The score was 13-12. E. Rhodes, I. Siler and H. Matlock.

**YOUR
LITTLE SAVINGS...
FINANCE
MORTGAGE LOANS**

THOMES of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are six thrifty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

BASEBALL CHATTER

Enchant stopped Champion's winning streak on Wednesday when they defeated the local club 1-0 in the best ball game of the season. It was a ball game and from start to finish a pitcher's duel. Malmberg, on the mound for Enchant, turned in a fine performance, pitching a six-hit and fourteen strike out game. Robinson, hurling for Champion, was in top form, allowing only two hits and registering fourteen strikeouts.

A light fall of rain fell during the first few innings and in the seventh a heavy shower of a few minutes duration forced the players from the diamond. Play was resumed however and the game was completed.

Hogg, a new recruit, playing at second was outstanding in his performance.

Hamilton, pinch hitting for Champion, in the ninth inning collected the only walk allowed during the game.

A return game with this club is eagerly anticipated by the fans.

With a good crowd of fans and the weather ideal, Champion and Nobleford clashed on the Nobleford diamond Tuesday evening. It looked like a win for Nobleford up to the seventh innings, with the score standing 2-1, in favor of Nobleford, but Champion noted for their strategy in tight places brought their heavy artillery into action and maneuvered through stiff opposition to win 7-2. Champion: Walker and Dutch Holman pitched for Nobleford.

Champion team will play Picture Butte, on Friday, with a return game here Sunday, at 2:30.

K. R. McLean, Sight Specialist 210 Southern Bldg., Calgary will be at the Drug Store on Tuesday afternoon, June 22nd.

Mrs. F. J. Rowley of Bermuda is expected here this week.

VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plot" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots. See the nearest Searle (Home) agent about the plot in your district.
